### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed an unobvious improvement over U.S. Patents 4,286,505 to Amdall and 6,026,777 to Kemnitz et al. Amdall and Kemnitz et al each disclose a piston for an IC engine having a piston body including two piston bosses, at least one piston head, at least one piston boss support, and at least one circumferential support (50 and 10, respectively), and at least one ring element. The unobvious improvement includes the at least one ring element is screwed onto the piston body forming a cooling channel between the ring element and the circumferential projection wherein the circumferential projection forms a support ring that is deformed when the ring element is screw onto the body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

U.S. Patents 5081968, 5261363, 6003479, and 6286414 each disclose a piston for an IC engine having a cooling channel.
